

Mathematical equations on the blackboard:

$$5T - 60(X)$$
$$60 - 6S(X)$$
$$30 \times \frac{60}{30} = X + (X+6)$$
$$12 = X + 6$$
$$6 = 2X$$
$$3 = X$$
$$4A - 8 = 12$$
$$4A = 20$$
$$A = 5$$
$$5B = 2 + 7 + 8$$
$$5B = 17$$
$$B = 3.4$$
$$4A + 8 = 12$$
$$4 \times 5 + 8 = 28$$
$$5B = 17$$
$$B = 3.4$$
