## 議課

### 優點

1. The teacher is patient.
2. The students are active to answer the questions.
3. The worksheet is interesting and it can arouse studnts' interest to think about the possible meanings of different gestures.

### 建議

The teacher can play the video again after the discussion is over to help the students to make sure what the understand.

## 觀課的心得與學習

The reading passage provide just few examples about the meanings of different gestures, but the teacher can find out more interesting instances for students to explore. Not just telling the meanings directly, the teacher encouages the students to discuss with the peers. I think that is a great activity for students.
