

# City Coffee Cup (National Capitals and Attractions) (Ten Countries and Capitals)

- 1. Coffee belt (latitude and temperature conditions of production, major production areas: Central and South America, Southeast Asia, Africa), name of coffee-to-milk ratio, practice ordering coffee, and coffee name bingo.
- 2. .City coffee cup, the name of the country corresponds to the name of the capital, and the name of the capital corresponds to the introduction of attractions.
- 3. Use Boundless Notes and GOOLGLE MAP to find the scenic spots based on the designated spots and take screenshots to introduce them.

The bean belt. Top 20 largest producers of green coffee highlighted in green (2011). The yellow area is between the Tropics of Cancer and Capricorn. List of countries by production: Brazil, Vietnam, Indonesia, Colombia, Ethiopia, Peru, India, Honduras, Guatemala, Mexico, Uganda, Nicaragua, Ivory Coast, Costa Rica, Philippines, El Salvador, Cameroon, Venezuela, Tanzania, Madagascar. Source for production statistics: FAOSTAT.

13-14 is the question group. Most of the coffee-producing areas in the world are located in the so-called "coffee belt", roughly between 25 degrees north latitude and south latitude. The natural environment suitable for the growth of coffee trees includes a temperature of about 15~25°C, annual rainfall of 1,000-3,000mm, and well-drained volcanic rock parent soil. On the other hand, the amount of coffee imported into a country mainly depends on the country's coffee production, coffee consumption population, national economic development and other conditions. Excuse me:

- [Question Group] 13. The "coffee belt" in the article most likely includes which of the following areas?
- (A) The Italian Peninsula in Southern Europe
  - (B) The mountains of the Caucasus in Western Asia
  - (C) Atlas Mountains in North Africa
  - (D) The Pacific Coast Mountains of China and the United States
