

THE TRIP OF RAINDROPS

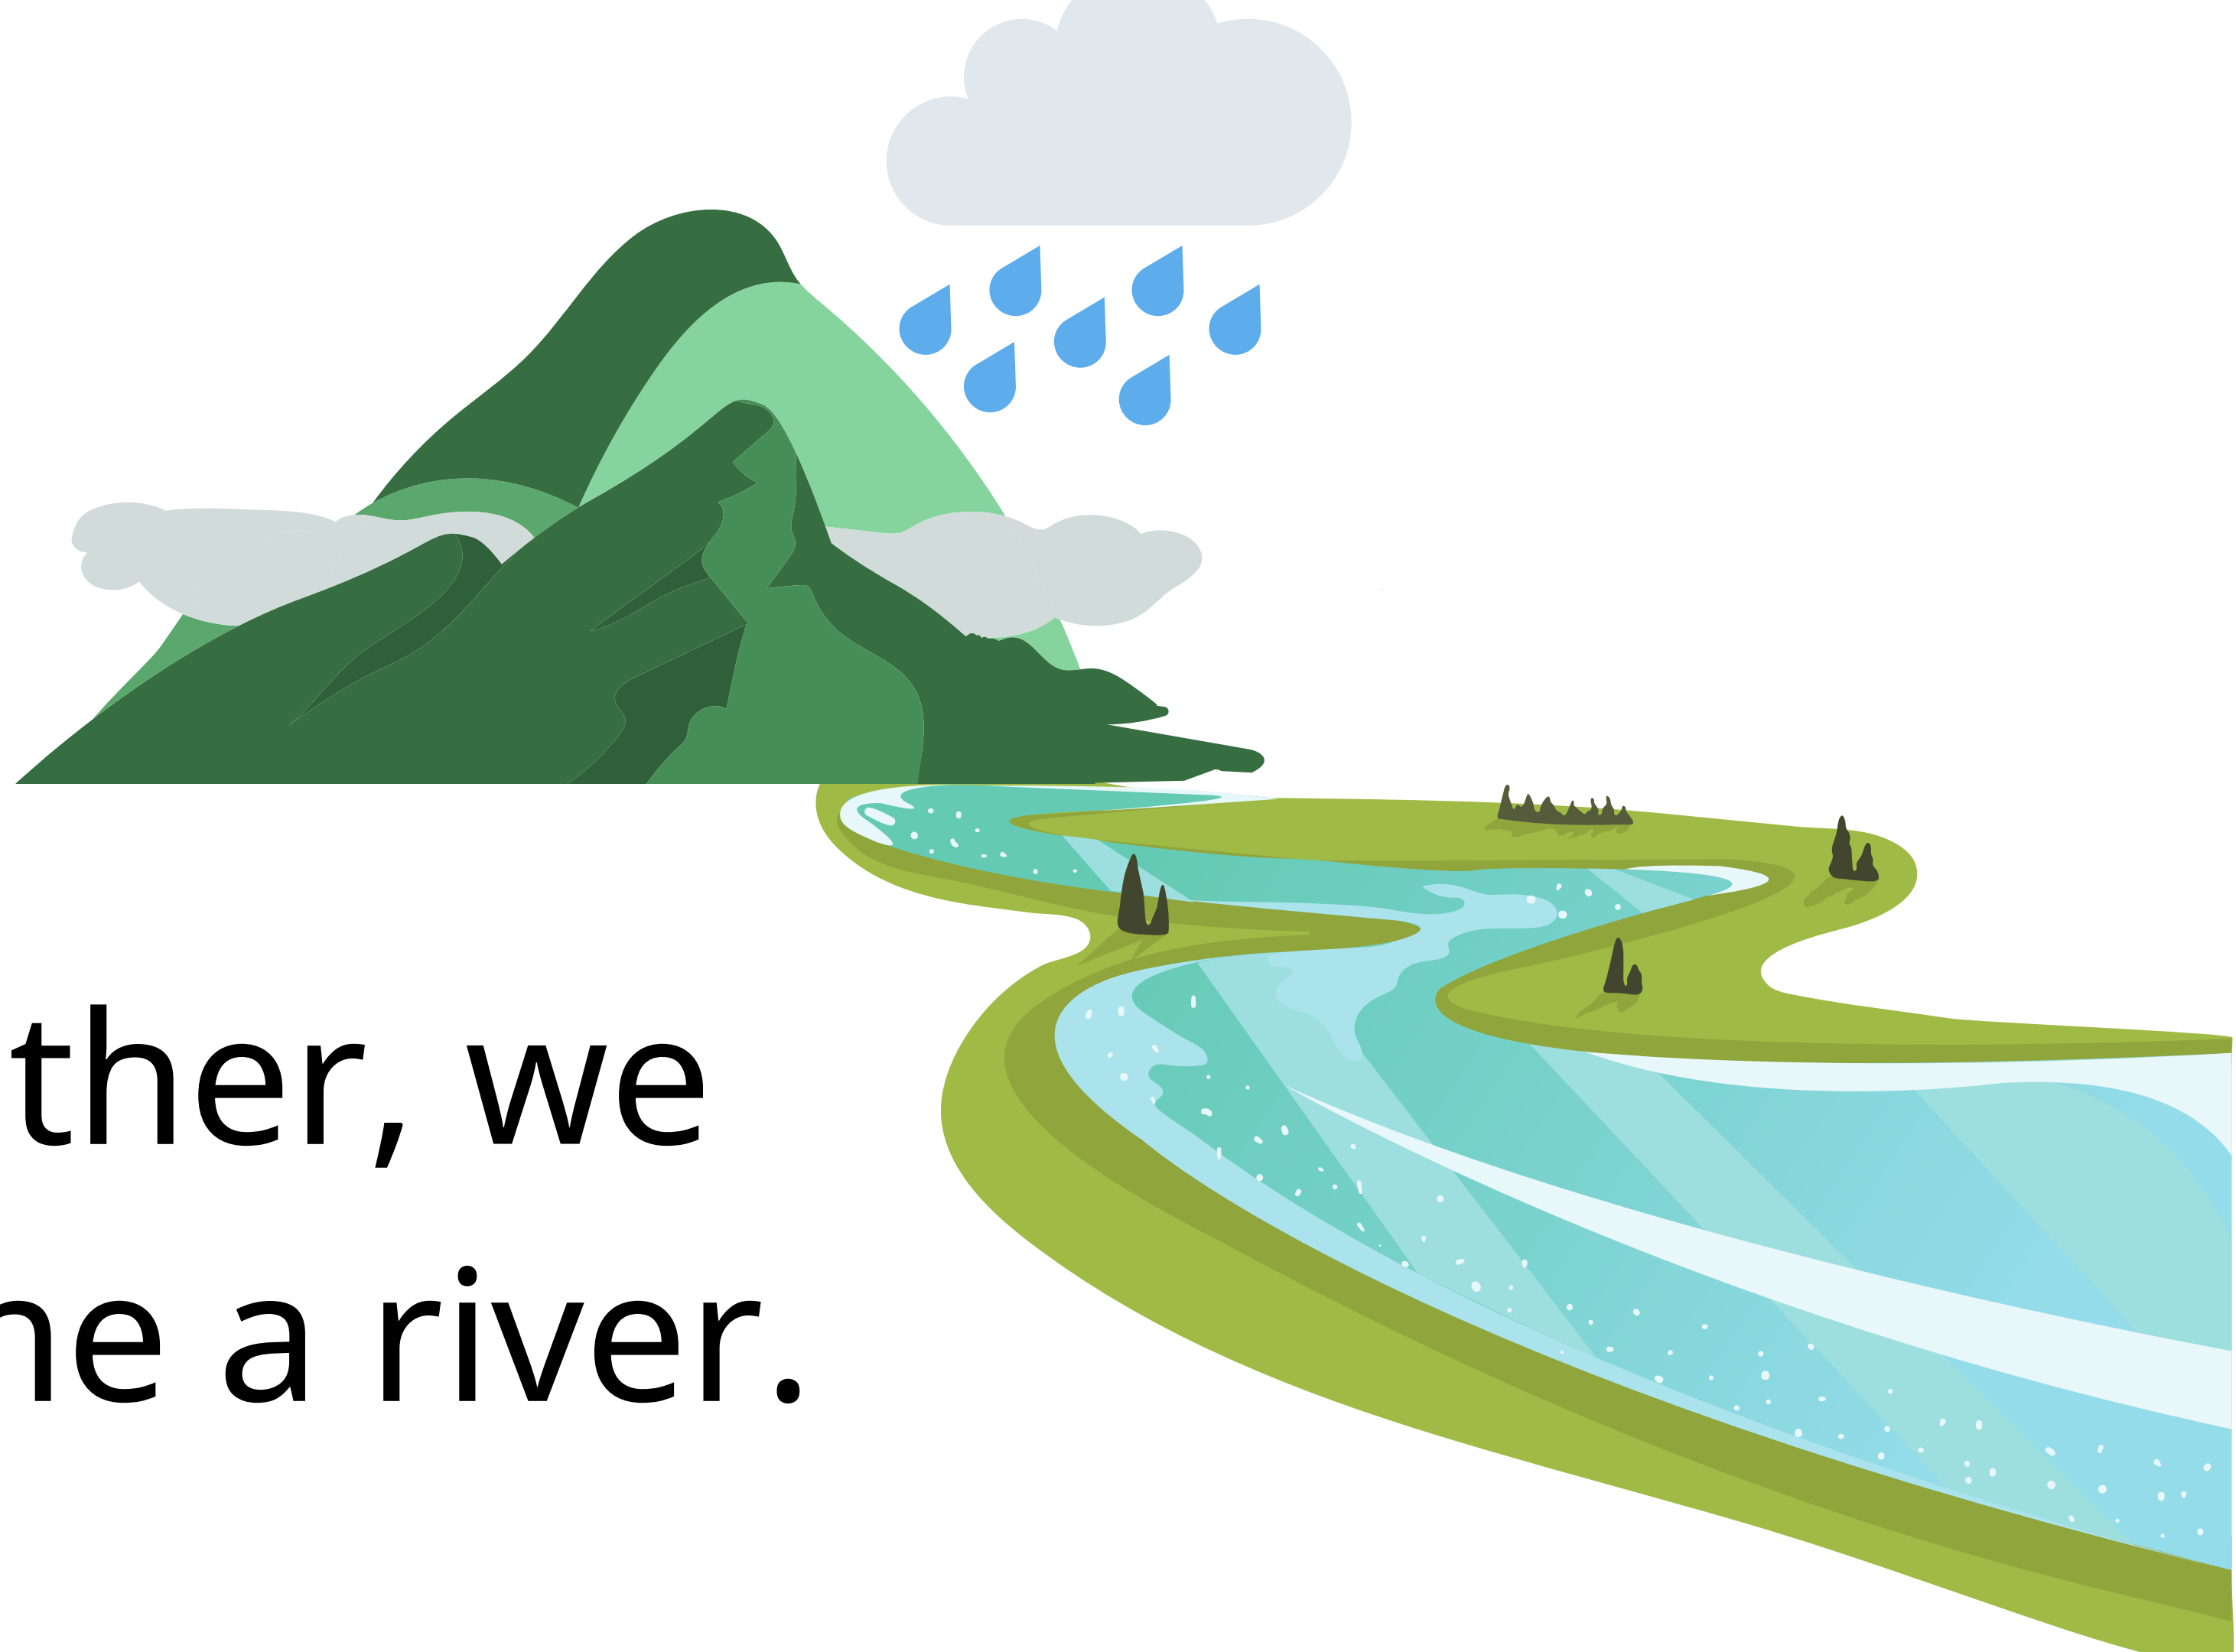

Rain, rain
It keeps raining.
We are raindrops
and we're falling.

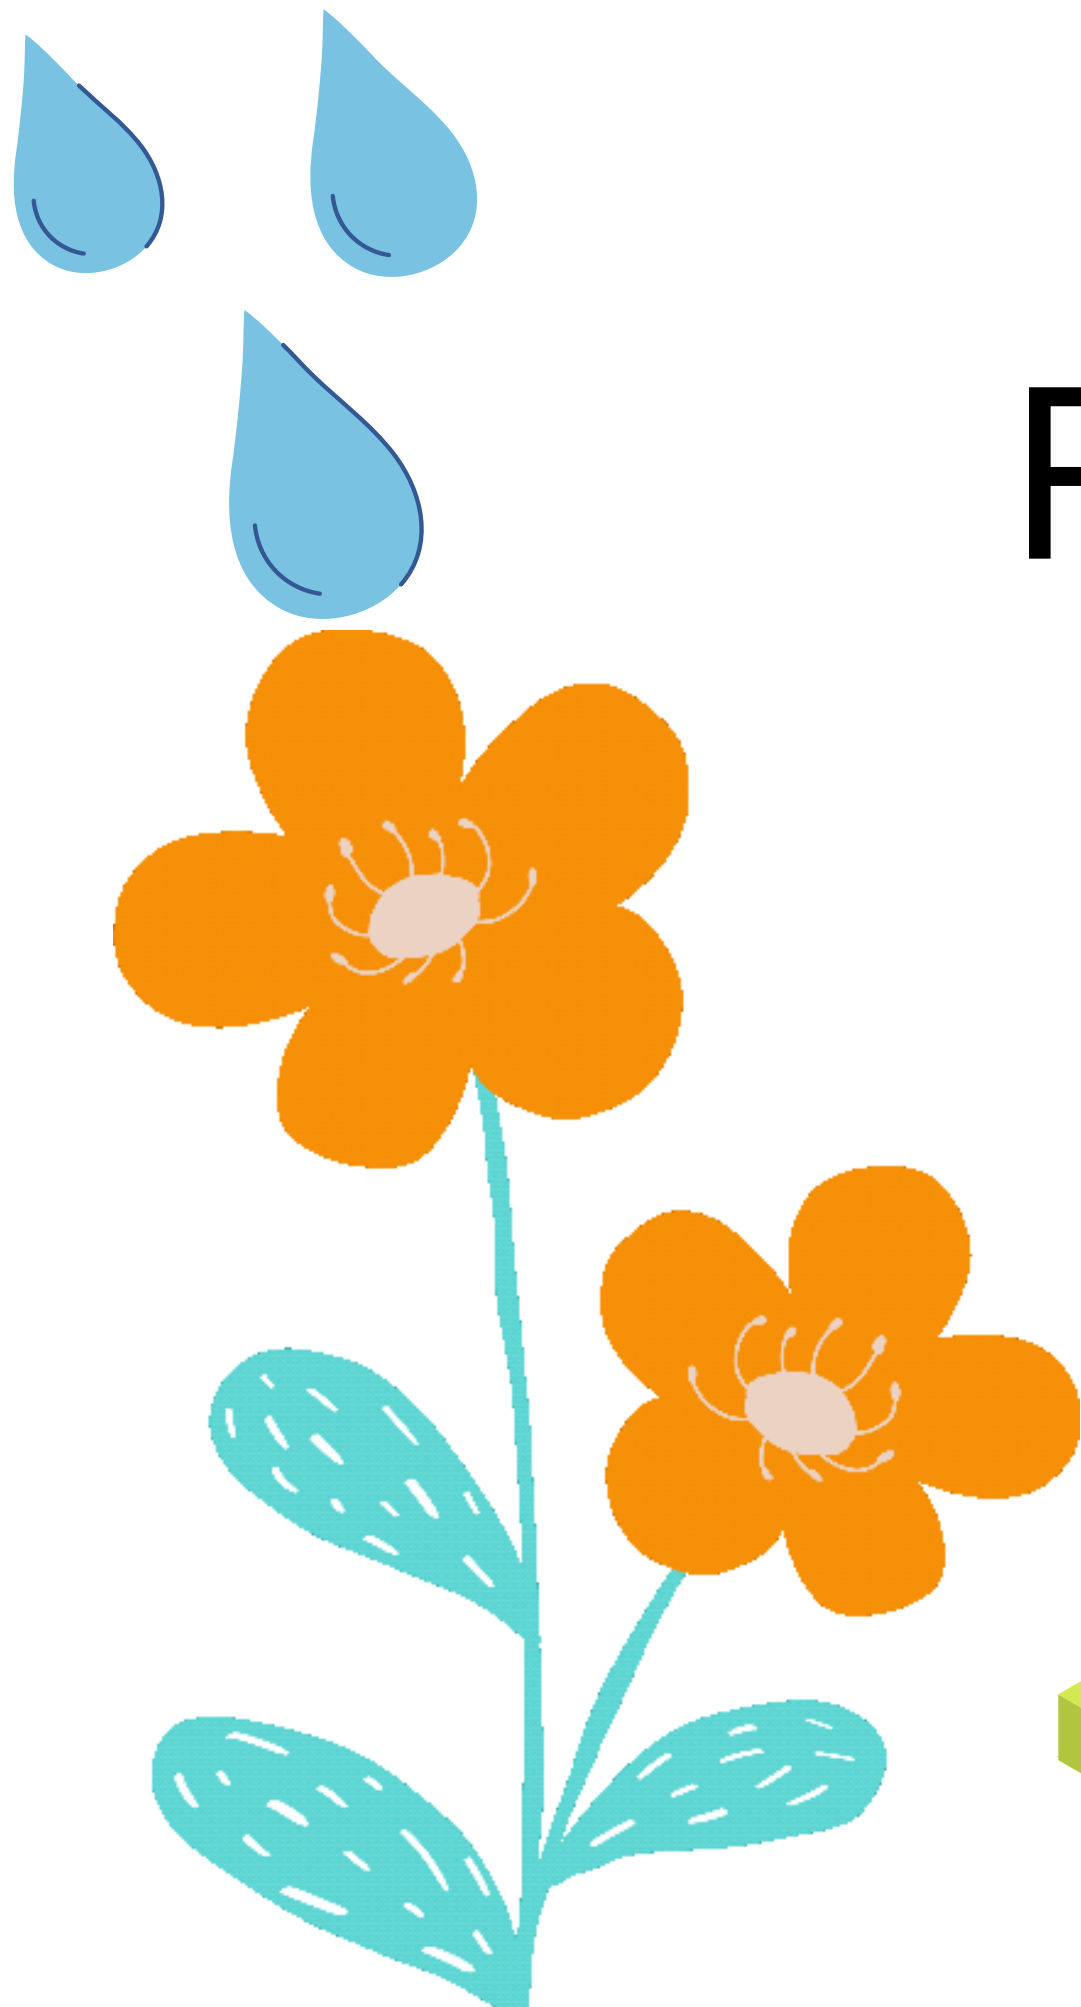

We fall
down in the
mountains.

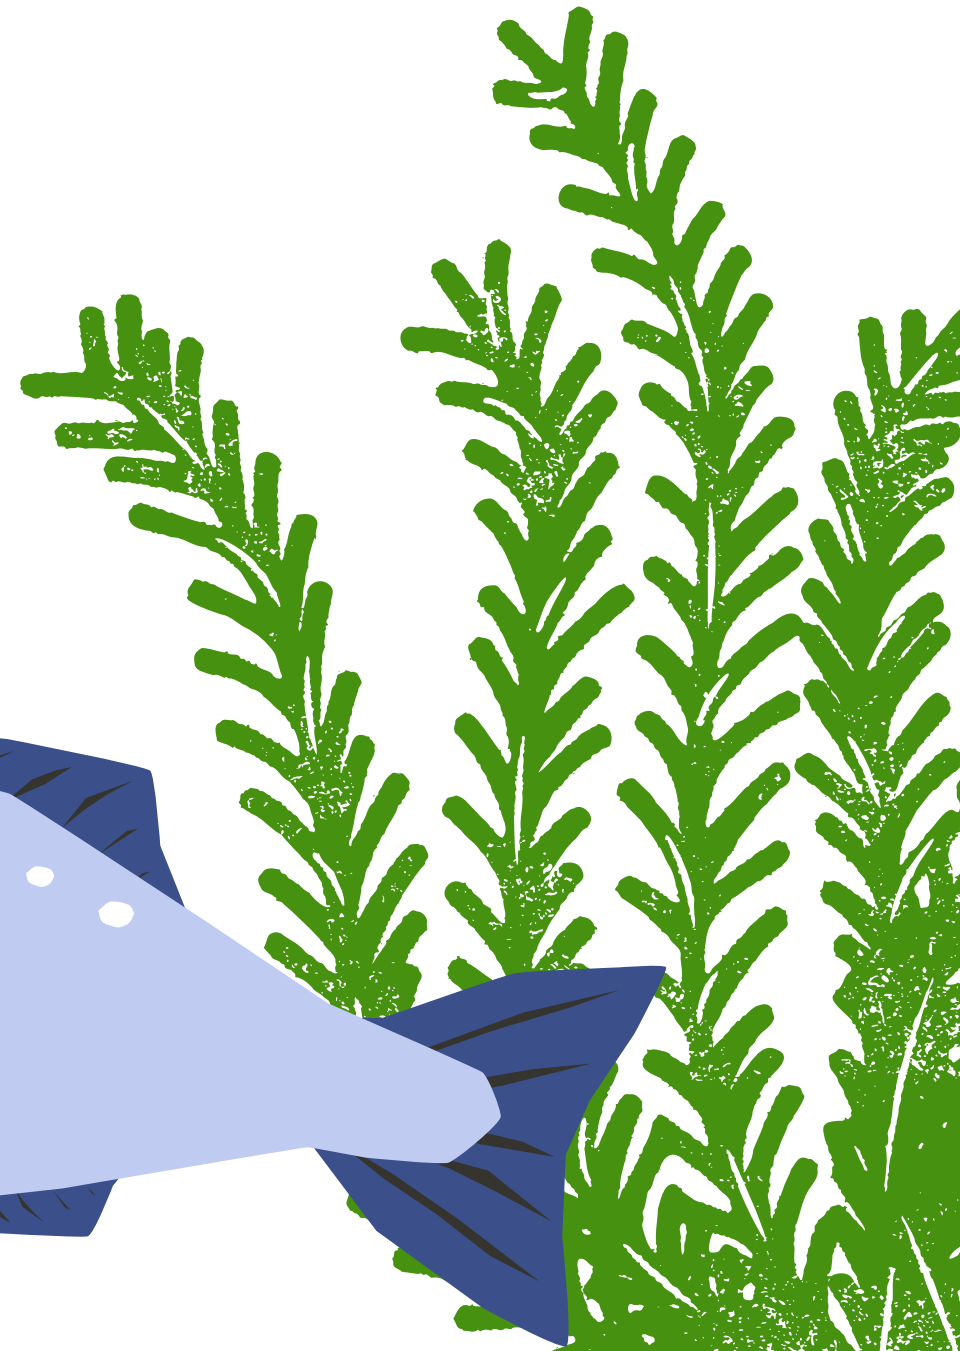

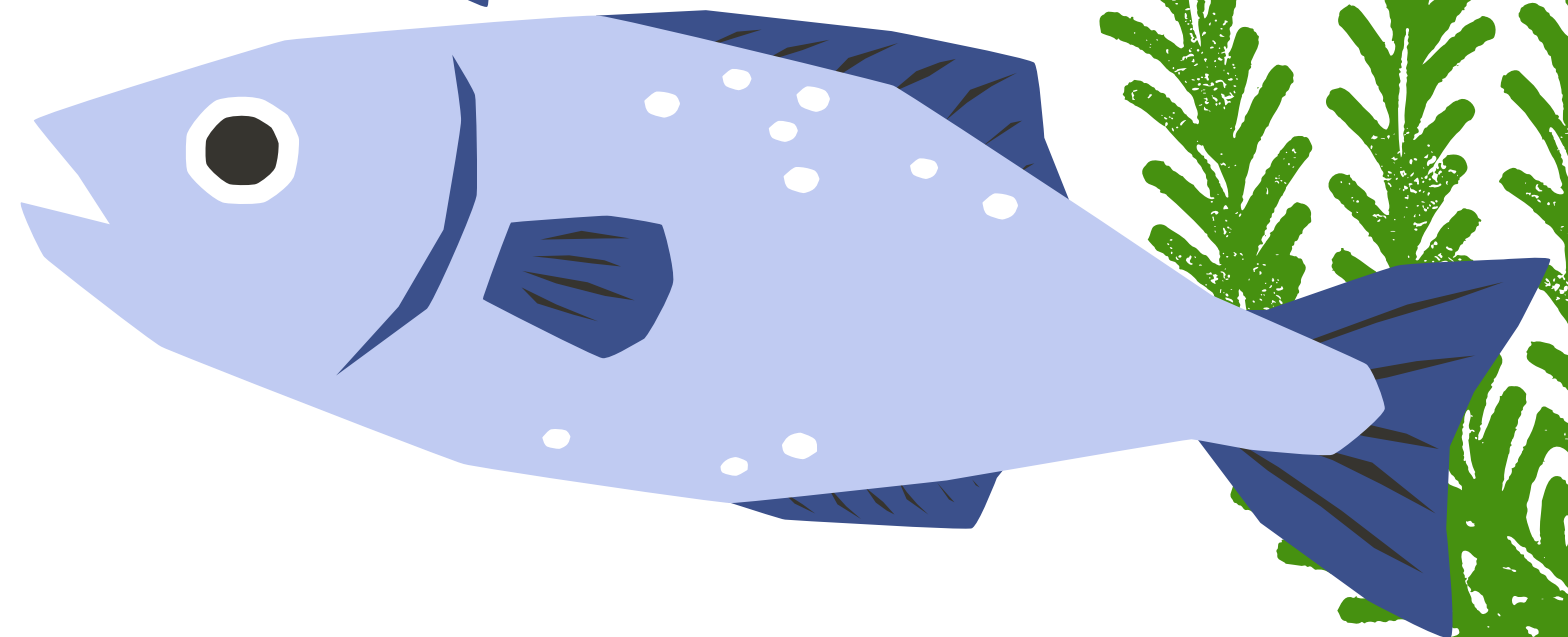

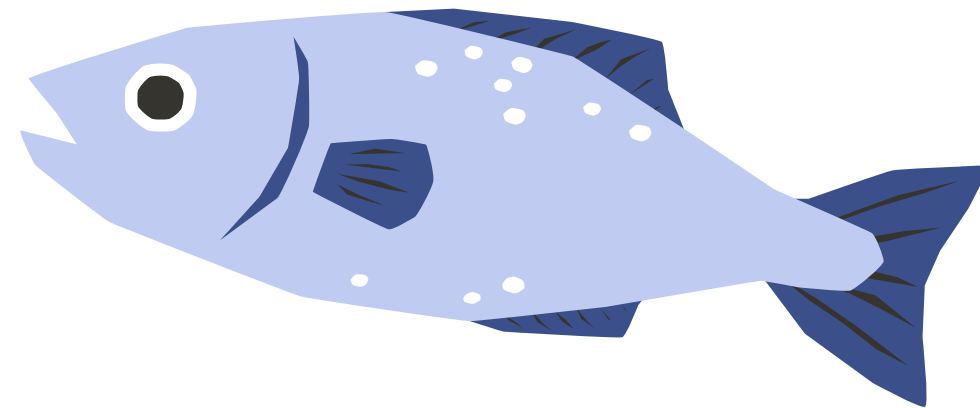

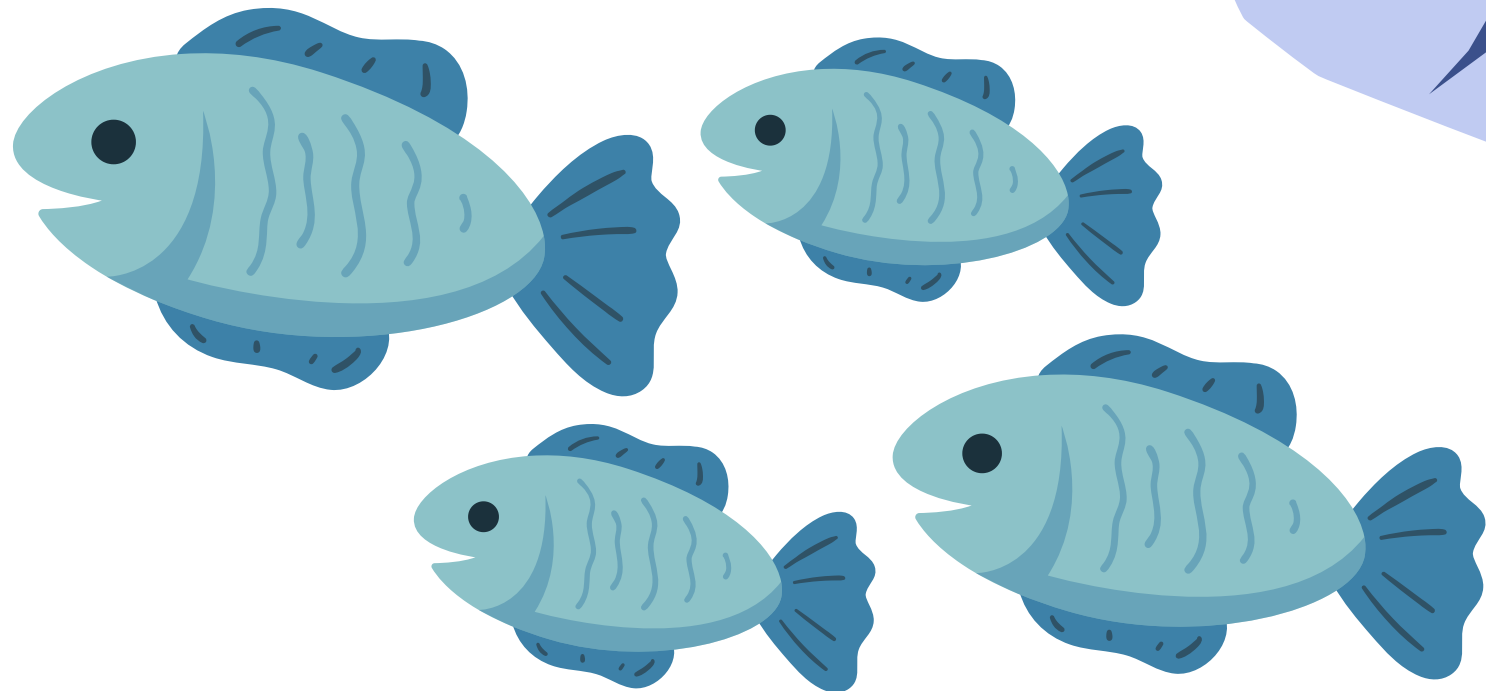

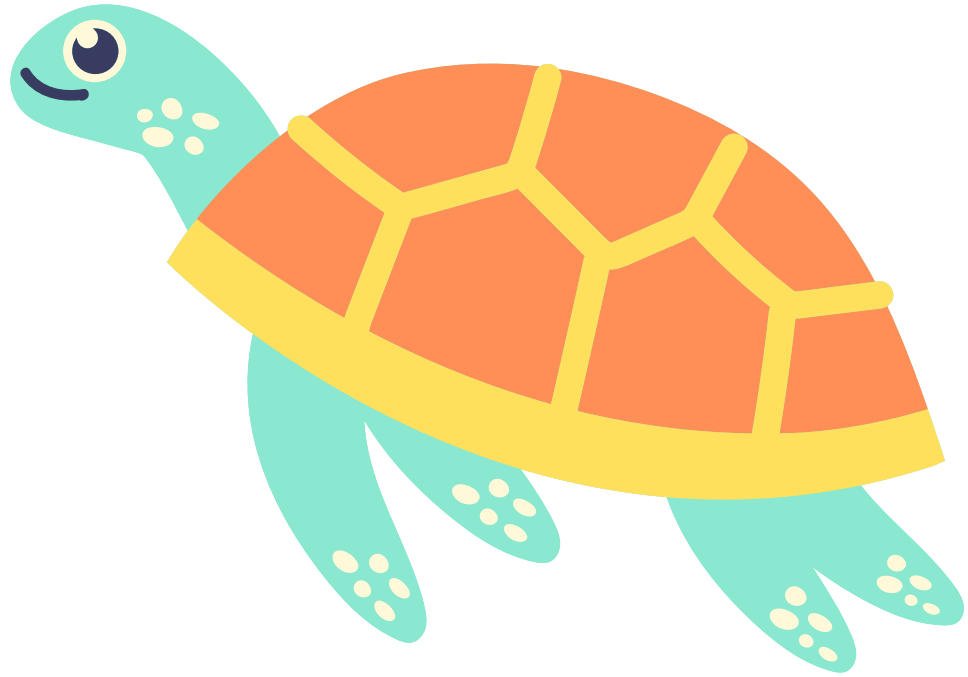

Together, we
become a river.

Plants need us.
Flowers need us.

Fishes and turtle
need us.

People need us to
shower and to wash
their hands.

People also need
to drink us.

If someday, I'm gone.
There will be NO
WATER.

Rivers and land
will be dry,
Plants and fishes
will not survive.

And what about humans ?

**Think about it, is
water important
to our life?**

How can we
"save water"?

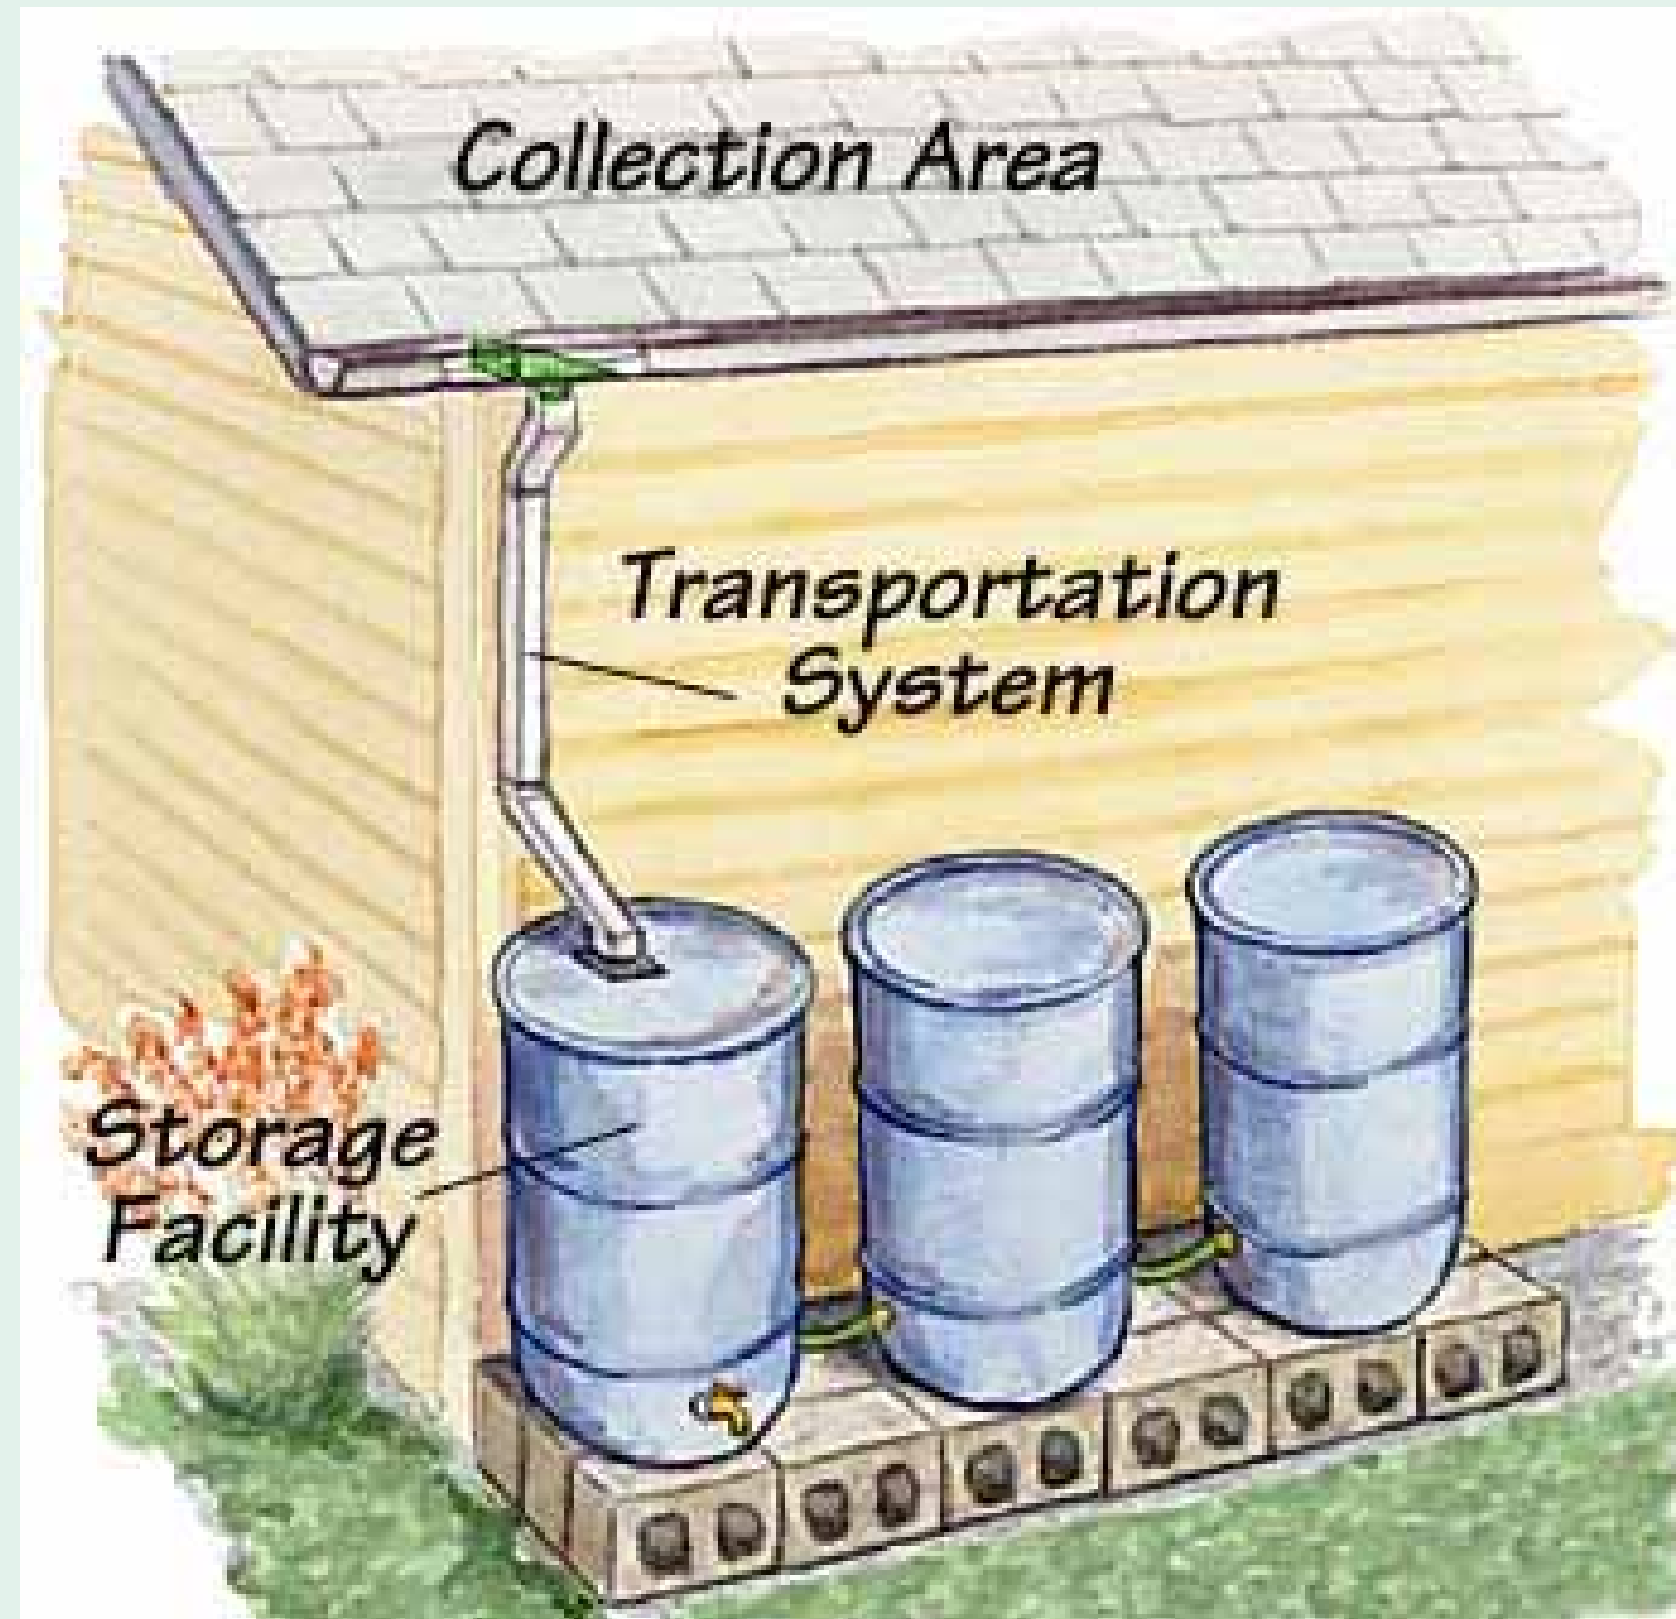

We can collect
rain water !

Eco-Friendly Practices in Our School

1. Rainwater Toilet 雨水回收廁所
2. Rainwater Tanks 雨水收集箱
3. Water Saving Faucet 省水龍頭
4. Automatic Lights 自動感應燈

Rainwater Collection

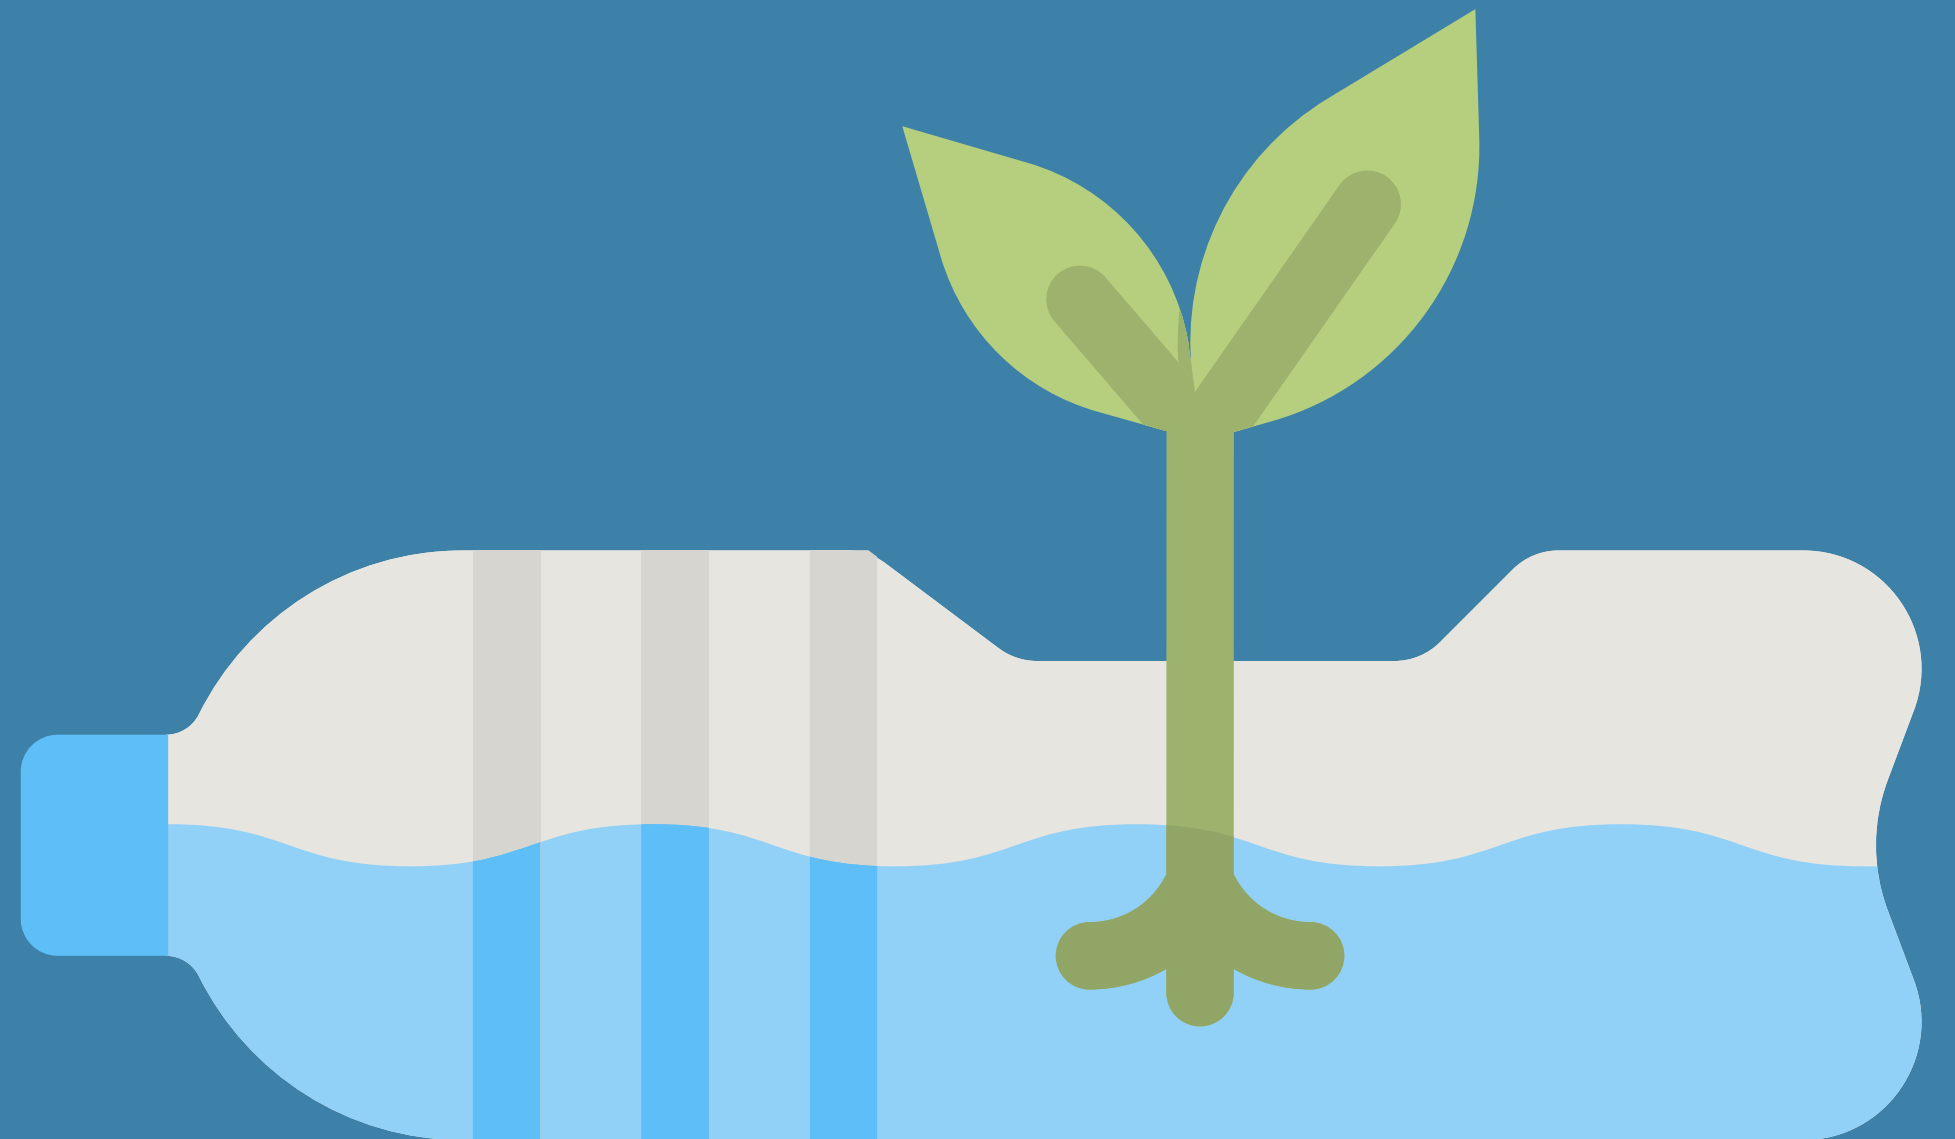

Water Saving Faucet

Let's reuse and save water!

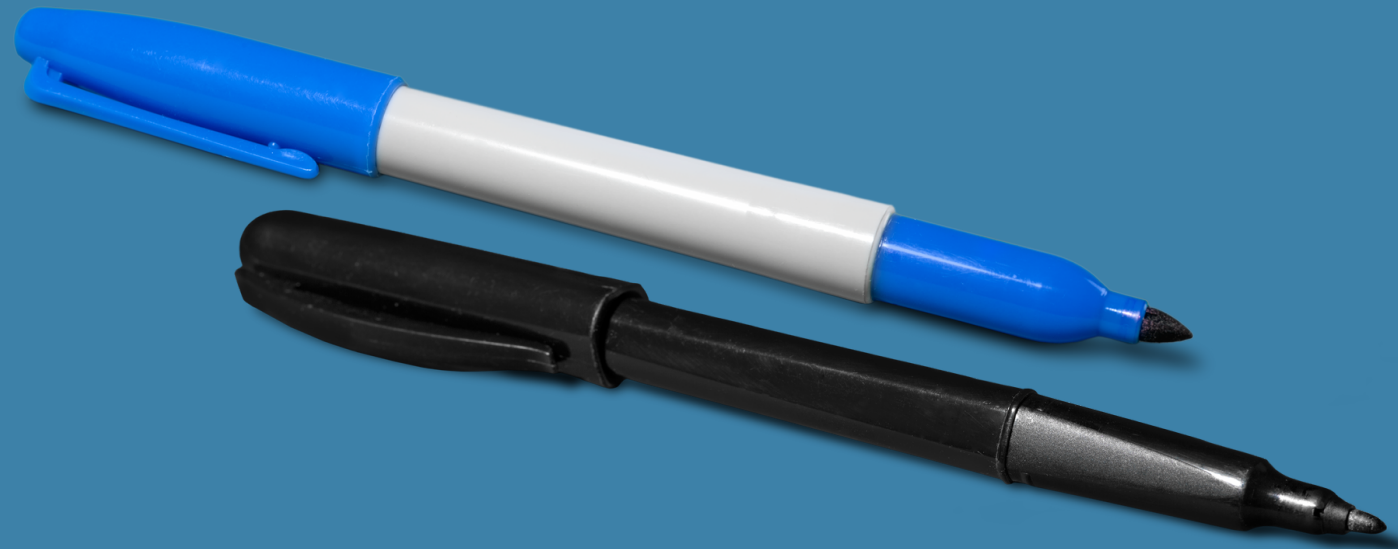

Reuse

Let's do it !

We need...

markers

scissor

plastic bottles
