

In this teaching demonstration, I felt that the lesson went smoothly and the classroom atmosphere was positive. Most students were willing to participate in the English learning activities, and they were also able to help one another when needed. I believe that motivation plays a key role in learning English. Therefore, I always try to integrate videos and games into my teaching. These activities usually capture students' interest and encourage them to take part actively.

In the future, I hope to provide more opportunities for students to practice speaking English. At present, many of them are still shy or hesitant to speak because they are afraid of making mistakes or feeling embarrassed. I need to encourage them more and create a classroom environment where they feel safe and supported, even when they make errors. My goal is to help students maintain their motivation and confidence in learning English, as I believe these are the most important factors for their success.
